

Sorter doctor program

Is your sorter not performing up to your needs?

If you are you experiencing sorting errors, limited capacity or worn out components, you could benefit from our sorter doctor program. After thoroughly reviewing your sorter, we provide you with a fitting recommendation, based on your existing system and requirements. Our proposals always consider reuse, repair or modification of existing components to prevent unnecessary costs.

Symptoms

The sorter doctor upgrade program will help you address productivity slowdowns in your existing sorter system, including:

- Sorting errors
- Limited capacity
- Legacy software & control
- Worn out components

Treatment

Equinox specialists perform a thorough examination of your system and learn your logistics goals and needs. This quick scan includes a visit to your distribution centre and a meeting to discuss your needs. After our visit, we create a report outlining possible upgrades that can address your specific needs. Our proposals always take into consideration the reuse, repair or modification of existing components to prevent unnecessary costs.

Result

- Accurate sorting
- Effective performance
- Increased capacity
- Improved ergonomics
- Software & control upgrades always available
- Extended life cycle

'Our sorting installation is now operating very accurately and efficiently. Thanks to Equinox's Sorter Doctor Upgrade Program the system can perform for many years!'
